

Siepe is a rug for exterior and interior environments with handmade embroidery.

The embroidery is executed with a one- or two colour flat braid on a support net.

The floor can be seen through the gaps created by this production technique and the texture of the support net.

Only one colour can be chosen.

The net is available in sand or basalto colour.

The rug can be also produced with only one embroidery pattern out of the two featured by this model; it can also be divided into sections of different dimensions.

The handwork and the preciousness of the designs advise against the use of Siepe in high traffic areas.
