

Series of floor lamps made by sewing a semi-transparent polyester cord resistant to atmospheric agents.

Base: black varnished AISI 304 stainless steel, plastic spacers.

Cover: removable and available in semi-transparent cord.

Suggested bulb: LED module 18W 3000K.

Notes:

Shoji lamps are available for both indoor and outdoor; the electrification of the outdoor version complies with the international standards for the connection to the grid in exterior environments.

The outdoor version is supplied with the alimentation cable only, to allow for the connection to the power grid according to the Client's need.

The lamp guarantee the protection IP65 (for USA market: EP65); the connection to the grid must respond to the same protection criteria. For this reason, the plug is not supplied.

The lamp is LED powered but offers the same warmth and harmony of a traditional lighting bulb.
