

Suspended platform.

The Shibui series also includes an armchair, a chaise longue and a ground platform.

**The natural materials featured in the Eres collection can be used outdoors, but not be directly exposed to the elements, and require some extra attention and care than traditional outdoor furniture. These products need to be used under a stable cover and to be protected overnight. It is also recommended that they are sheltered indoors for seasonal protection. Some of the materials will mature and will change appearance and colour over time. And this will naturally happen.**

**Structure:** avorio varnished stainless steel AISI 304 provided with steel suspension cords.

**Seat panel:** bamboo sticks tied with jute straps and fixed to the structure.

**Seat pad:** independent and with removable cover, in polyester fiber with insert in stress resistant expanded polyurethane and fixed foam covering in waterproofed polyester.

**Seat pad upholstery:**

- Lino Délavé
- Canapa Délavé

**Notes:**

The suspended platform is completed with cables in stainless steels AISI 316 covered with linen and clamps and carabiner in stainless steel AISI 316 to hang it from a beam or the ceiling.

The provided cables are installed so that the platform can be hung from ceilings with a standard height of 270 cm.

The seat pad is also available upon request in natural latex, paineira vegetable fiber and woolen felt, fixed covering in 100% cotton fabric.

The entirely natural padding of the seat pad guarantees the same comfort of a traditional synthetic padding.

The paineira vegetable fiber is water repellent, non-allergenic and completely biodegradable.

The structures and the sticks in bamboo mature over time, changing in colour, compactness and texture, without this affecting their quality.

The product can be used also in interior environments.

We advise to use a Winter Set protection cover.
