

Floor covering composed of square elements made of concrete, which is processed and coloured by hand.

**Material:**

Elements made of concrete- based mortar, which are solid, resistant and easy to maintain.

The surface is naturally porous and is protected by a treatment specific for concrete.

**Characteristics:**

The surface of the Marostica elements may feature slight variations of the tone and the density of the colour: these features are to be considered the quality that makes each element unique and inimitable.

**Dimensions:**

The Marostica elements have a dimension of 60x60x2 cm each.

**Applications:**

Floor covering for both indoors and outdoors, in residential, public and commercial spaces, subject to light traffic.
