

Wall covering in glazed lava stone.

Material:

Luce is a strong, compact material, which is easy to maintain.

The elements are made of lava stone and are glazed by means of handcraft techniques; the colour remains transparent and luminous and let the porosity and the imperfections of the surfaces show through.

The Luce elements are made and finished by hand in exclusive colours by Nicolò Morales.

Characteristics:

The natural material composing glazed lava stone react in an unpredictable way to the handcraft production processes to which they are subjected.

The surface of the elements may feature differences in thickness and slight variations of the tone and the density of the colour: these features are to be considered a quality that makes each element unique and inimitable.

Dimensions:

Luce elements are available in the following dimensions: 75×2,5×1 cm, 75×4,5×1 cm and 75×6,5×1 cm.

Luce elements can be produced in custom dimensions.

Applications:

Covering of vertical surfaces, both indoors and outdoors, in residential, public and commercial spaces.
