

Side table/cart with double round top.

**Structure:** gloss varnished stainless steel AISI 316 (reference colours: Mano Lucida wood sample collection).

**Upper and lower top:** flat surface in laminate, gloss-varnished in a colour matching that of the structure, frame in white ash wood.

**Wheels:** black plastic material.

**Notes:**

The white ash, or American ash, is a tall tree native to North America whose wood has always been used in cabinetry and carpentry for its qualities of strength and elasticity.

The upper and lower tops are equal; the white ash wood frame is treated to be water and oil-repellent with water-based products to limit the absorption of liquids and greasy substances.

Giorgio can be easily displaced thanks to the four plastic wheels positioned under the base.
