

Suspended platform.

The Shibui series also includes a ground platform.

**Structure:** matt varnished stainless steel AISI 304, grafite colour, provided with steel suspension cords if suspended.

**Seat panel:** natural or dark brown dyed sassafrass heartwood sticks tied with jute straps and fixed to the structure.

**Seat pad:** independent, in recycled and biodegradable polyester fibre, insert in stress resistant expanded polyurethane and fixed foam covering in water-repellent polyester fabric.

**Seat pad upholstery:** removable and available in the outdoor fabrics listed here below.

**Notes:**

The platform is completed with cables in stainless steels AISI 316 covered with polypropylene and clamps and carabiner in stainless steel AISI 316 to hang it from a beam or the ceiling.

The provided cables are installed so that the platform can be hanged from ceilings with a standard height of 270 cm.

The sticks in sassafrass heartwood are treated to be oil and water repellent with a water-based finish that limits the absorption of liquids and greasy substances.

As an alternative to the seat pad upholstered in fabric, it is possible to use one or more Plump, pad made weaving by hand elements in Chain Outdoor mélange tubular knit.

The product can be used also in interior environments.

We advise to use a Winter Set protection cover.
