

Ros(a)e is a hand tufted rug.

The round designs which decorate this rug in relief are hand chiseled in the wool surface according to a predetermined pattern.

The rug can be created in one colour, with designs tone on tone, or with a colour for the surface and a maximum of 3 colours for the designs.

The designs can be produced either in wool or in silk.

Considering that silk dyeing always results in lighter tones, this creates a tone on tone effect on rugs with surface in wool and design in silk of the same colour.
