

Suspension lamps.

Cover: Rope cord sewn in a spiral-like pattern; an additional internal shade, made of a semi-transparent polyester cord sewn in a spiral-like pattern, enhance the lamp brightness.

Lighting body: non-replaceable LED module, diffused light 10W.

Notes:
Taiki is supplied with suspension cable complete with the cylinder for the fixing to the ceiling at the desired height, power cable and power LED driver.

The lamp guarantees IP65 protection (for the USA: EP65); the power LED driver supply guarantees IP20 protection instead: making connecting to the grid, which must be made with IP65 protection, the power LED driver supply must be installed in such a way as to guarantee equivalent protection.

The lamp is LED powered but offers the same warmth and harmony of a traditional lighting bulb.

This product can be used also in interior environments.
