

Ladybird is a handmade rug for exterior and interior environments.

The surface of the rug consists of elements produced with one- or two-colour cords in Rope yarn, shaped by hand and then machine sewn to reproduce plants and animals.

The elements are then sewn together to form a large decorating panel.

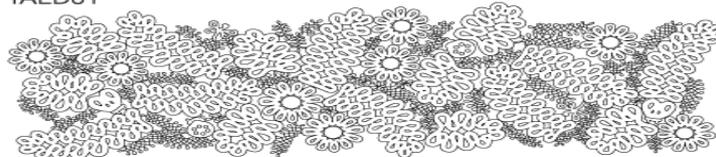

The floor can be seen through the gaps within and between the elements.

The Ladybird rug is also ideal as wall decoration.

The textile structure of Ladybird is free: an intense stepping may cause a variation of the rugs dimension.

The handwork and the preciousness of the designs advise against the use of Ladybird in high traffic areas.
