

Grafismi is a modular rug for exterior and interior environments with handmade decoration.

The geometric embroidery is executed with flat braids in Rope yarn on elements in Kimia fabric in sand or basalto colour with size of 15, 25 and 35 cm, which form the backing of the rug.

Once embroidered, the elements are sewn together with Punto Zigzag to form the surface of the rug.

The number and the dimension of the elements vary according to the dimension of the rug.

The floor can be seen through the gaps created by this production technique and the texture of the backing.

Only one colour can be chosen for the backing and from two to three colours for the embroidery.

Each element composing the Grafismi rug is embroidered, on the whole length, with the same pattern and in the same colour.

In order to obtain the best possible chromatic effect, it is always necessary to choose from two to three colours from the sample collection Corda 10.

The sequence of the different patterns and the different colours is established by the company during production.

The handwork and the preciousness of the designs advise against the use of Grafismi in high traffic areas.
