

Wooden benches and side tables with top panel in wood or covered with fabric.

Toku series also includes shading structures made of wood and fabric available in two dimensions, a sun bed and trays.

Structure: cedar heartwood, adjustable plastic material feet.

Top panel:

- cedar heartwood slats
- marine plywood, internal fixed cover in three-dimensional polyester fabric.

Marine plywood upholstery: fixed and available in Wara fabric.

A seat pad is necessary for complete wooden benches seating comfort.

Seat pad: removable, in expanded polyurethane, fixed foam cover in water repellent polyester.

Seat pad upholstery: removable and available in the outdoor fabrics listed here below.

Notes:

The structure in cedar heartwood is treated with a natural impregnating product. Wood normally matures over time, changing in colour, compactness and texture, without this affecting its quality.

We advise to use a Winter Set protection cover for the upholstered version only.

For this product featuring a top in wooden slats, the prolonged use of the Winter Set protection usually proposed for products intended for outdoor use is not recommended. The use of the Winter Set could create a humid environment, with no air recycling, which could consequently generate damage to the material. To avoid permanent damages, the use of the Winter Set is allowed only for short periods, such as for example to protect the product during sudden rain falls. As to maintain the product at its best, it is also recommended to always dry it after prolonged exposure to heavy rain or high humidity.
