

Lounge chair and chaise longue.

**Structure:** turned bamboo, treated with water-based products that do not affect the wood colour and the naturalness of the surface. Plastic spacers.

**Seat and backrest:** tatami panel in igusa, natural or designed by a delicate multi-coloured pattern that gives this traditional material a modern textile look.

**Notes:** the natural material used for Shibusa seatings is resistant yet delicate and matures over time without losing its structural characteristics, turning colour from a light green to straw yellow.
