

This modular rug for exterior and interior environments is created by joining elements in Maris fabric.

The surface of the rug consists of parallel strips with different dimension.

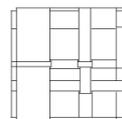

The strips are positioned according to a pre-established scheme, spaced apart orthogonally intertwined and then sewn with Zigzag stitch.

The floor can be seen through the gaps created by the intertwine technique as well as through the fabric weave.

Only one colour can be chosen.

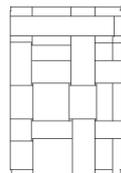

The Lay rug can be made to measure up to a maximum size of 400 cm in both width and length.
