

Indoor seating platform with central backrest composed of long shaped cylindrical mobile elements.

Platform padding: expanded polyurethane mixed with recycled and biodegradable polyester fiber, layer of recyclable polyester, fixed cotton covering.

Platform upholstery: fixed, composed of different indoor fabric offcuts.

Backrest padding: expanded polyurethane mixed with recycled and biodegradable polyester fiber, fixed covering in cotton fabric.

Backrest upholstery: fixed, in an elastic tubular knit produced with polyester yarns remained from the weaving of the indoor fabrics in the collection.

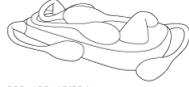

Notes: the long, shaped elements acting as backrests are fixed but can freely move.

Awards:

The Metamorfosi collection has been awarded the Green GOOD DESIGN AWARD 2023 and the NYCxDesign Award 2023 in the category of Environmental Impact.

The AZ Awards awarded the collection both as one of the best products selected in the Furniture Systems and Collections category and two Honorable Mentions, one for its design and one for its social impact.
