

Screen composed of left, right and central elements.

**Frame:** natural ash heartwood, hinges made of a flat cord in Rope yarn, plastic spacers.

**Vertical cover:** made of polyester elastic straps in m lange colour.

**Notes:**

Senkai screen is offered in predefined compositions of two, three or four elements.

The natural ash heartwood is treated with a transparent finish that limits the absorption of liquids and greasy substances.

The elastic straps that form the surfaces of Senkai are approximately 3 cm wide and are twisted to create optical effects that change continuously depending on the inclination of the panels or the viewer's position.
