

Dining table.

The series Plano also includes a side table and bookshelves with two or four shelves.

Base: cataphoresis treated steel, matt varnished in a colour matching the top, plastic spacers.

Top: Cementoskin® coloured concrete.

Notes:

Cementoskin® is a high-performance natural material. Suitable for both indoor and outdoor use, in residential as well as public projects, it is coloured in the mass with iron oxides, which give the surfaces a precious appearance and a visual and tactile sensation comparable to velvet.

The colours are stable and resistant to UV rays, abrasion, freeze/thaw cycles, salt and fire. Cementoskin® surfaces are treated against stains, making them easier to clean, even in the case of substances such as coffee, oil, wine or lemon.

This product can be used also in interior environments.

For this product, the prolonged use of the Winter Set protection usually proposed for products intended for outdoor use is not recommended. The use of the Winter Set could create a humid environment, with no air recycling, which could consequently generate damage to the material. To avoid permanent damages, the use of the Winter Set is allowed only for short periods, such as for example to protect the product during sudden rain falls. As to maintain the product at its best, it is also recommended to always dry it after prolonged exposure to heavy rain or high humidity.
